

Abdallah Wajih, MBBCh

Physician (MBBCh) · Digital Health & Health Informatics

contact@dr-abdallah-wajih.com | +20 103 609 3934 | dr-abdallah-wajih.com | linkedin.com/in/dr-abdallah-wageh |
Egypt, open to remote & Gulf relocation

Summary

Licensed physician managing a Ministry of Health primary care unit and founder of five live digital products, led by Tabaa, digital protection for Android and Windows, and Hala, a drug reference for Egyptian doctors. Focused on digital health and health informatics: decision support, HL7/FHIR interoperability and clinical coding.

Skills

Medical: Licensed clinical practice (Egypt), primary care management, documentation quality

Health Informatics: HL7 v2, FHIR, clinical decision support, integration engines (Mirth / Open Integration Engine), ICD-10 and LOINC coding, NPHIES awareness

Product: Founding and running digital products, idea-to-launch delivery, Arabic-first and privacy-first design

Data & AI: SQL, Python (fundamentals), medical AI output evaluation and rubric design

Languages: Arabic (native), English (professional)

Experience

Physician · Primary Healthcare Unit Manager

Jun 2026 – Present

Ministry of Health & Population · Egypt

- Lead the medical and administrative team and daily operations of a community primary care facility

Founder & Developer

Jan 2026 – Present

Tabaa and 4 more live products · web, Android, Windows, Telegram

- Founded Tabaa and shipped 4 more live products, from a drug reference for Egyptian doctors to Telegram tools
- Own each product end to end: problem definition, design, build, launch and operation

Medical Intern (Doctor)

Mar 2024 – Feb 2026

Al-Azhar University Hospital · Assiut, Egypt

- Rotated for 2 years through Internal Medicine, General Surgery, Pediatrics, Ob/Gyn and Emergency

Projects

Tabaa | tabaa.net

Jan 2026 – Present

- Main product: protection from pornography and digital addiction at the operating-system level. Apps for children, adults and supervisors on Android plus Windows desktop protection, with user-chosen commitment levels (optional, timed, permanent), daily app time limits and a password-protected pause

Hala | halamd.com

Apr 2026 – Present

- Drug reference for Egyptian doctors: instant on-device search across 25,348 drugs with prices, active ingredients and alternatives, adult and pediatric doses and ready-made prescriptions; works offline

Werdy | Google Play

Jun 2026 – Present

- Fully local self-accountability and journaling app (text, voice and video entries) with optional backup to the user's own Google Drive

Puregram | puregram.app

- Independent build of Telegram's open-source apps for Android and Windows: channels, bots and groups stay closed until allowed, and blocks are permanent; not affiliated with Telegram

Saher | t.me/Saher_TeliBot

- Telegram group protection bot that auto-removes spam links, banned words and invites, managed from a Telegram Mini App with staff roles

Technologies: Kotlin, Jetpack Compose, Android Device Owner, NestJS, Electron, Next.js, TypeScript, Web Worker search, Offline-first, Flutter, Hive, Google Drive API, Telegram Android & Desktop forks, FastAPI, PostgreSQL, Python, python-telegram-bot, React

Education

MBBCh, Medicine & Surgery | Faculty of Medicine, Al-Azhar University · Assiut

Dec 2023
