

Abdallah Wajih, MBBCh

Physician (MBBCh) · Health Informatics & Digital Health

contact@dr-abdallah-wajih.com | +20 103 609 3934 | dr-abdallah-wajih.com
linkedin.com/in/dr-abdallah-wageh | Egypt · open to remote & Gulf relocation

Licensed physician working in health informatics and digital health. Founder of Tabaa (tabaa.net), a digital self-control platform for Android and desktop, and creator of a clinical decision-support tool built from Egypt's 2020 IMCI protocol. Currently managing a Ministry of Health primary care facility, with hands-on work in healthcare interoperability (HL7, FHIR) and integration engines: a rare profile that understands the clinical problem from the inside and knows how it becomes a working digital system.

SKILLS

Medical: Licensed clinical practice (Egypt), primary care management, IMCI 2020 protocol, clinical documentation quality

Health Informatics: HL7 v2 / FHIR, clinical decision support, healthcare integration engines (Mirth / Open Integration Engine), medical protocol digitization, NPHIES awareness

Data & AI: SQL, Python (fundamentals), medical AI output evaluation and rubric design, modern AI tooling

Product: Founding and running digital products, Arabic-first design, healthcare unit management

Languages: Arabic (native), English (professional)

EXPERIENCE

Physician · Primary Healthcare Unit Manager

Jun 2026 – Present

Ministry of Health & Population · Egypt

- Manage the clinical and administrative team and full daily operations of a primary care facility serving an entire community
- Apply Egypt's 2020 IMCI pediatric protocol in daily practice, the same protocol later digitized into a clinical decision-support tool

Founder & Developer

Jun 2024 – Present

Tabaa · tabaa.net · digital health & wellbeing

- Architected an OS-level Android self-control platform on Device Owner APIs with a signed-key trust model, uninstall protection, a custom Telegram client (TDLIB over Dart FFI), and a desktop companion app

Medical Intern (Doctor)

Mar 2024 – Feb 2026

Al-Azhar University Hospital · Assiut, Egypt

- Completed a 2-year rotational internship across Internal Medicine, General Surgery, Pediatrics, Ob/Gyn, and Emergency Medicine

SELECTED WORK

IMCI Clinical Decision Support **BUILT**

Egypt's 2020 IMCI pediatric protocol as a deterministic, auditable, Arabic-first rules engine for high-pressure primary care, born from daily practice in a Ministry of Health unit

Tabaa · tabaa.net **LIVE**

Digital self-control and discipline platform for Android and desktop, designed Arabic-first for family digital wellbeing

Healthcare Integration Lab **HANDS-ON**

Self-hosted integration engine (Open Integration Engine, Mirth family) running a working HL7 v2 to FHIR conversion channel: ADT messages transformed into Patient, Encounter, Observation and Condition resources with LOINC and ICD-10 coding

HIGHLIGHTS

- Founder of Tabaa, live in production (Android + desktop)
- IMCI decision-support tool built from frontline practice
- Working HL7 v2 to FHIR conversion lab
- Manages a Ministry of Health primary care facility
- Bilingual portfolio at dr-abdallah-wajih.com

EDUCATION

MBBCh, Medicine & Surgery

Al-Azhar University, Assiut · Dec 2023
